

Now Updated and Broader Coverage of the Subject in  
This New Edition of the Award-Winning Book

## **INFORMATION RETRIEVAL SYSTEMS** **Characteristics, Testing and Evaluation, 2nd Ed.**

By F. Wilfrid Lancaster

The First Edition of this book received the "Best Book in Information Science" award from the American Society for Information Science. This new edition is expanded, and provides broader coverage on information storage and retrieval.

The focus is not on equipment, but on the "intellectual" aspects of systems and services. It examines factors such as user-system interaction, search strategy, indexing, and vocabulary control that significantly affect the performance of all types of information services. Emphasis is on design and evaluation aspects. 381 pp. (1979) **\$19.95**

Important NEW Sourcebook... With More Information on  
This Subject Than Any Other Available Volume

## COMPUTER NETWORKS AND THEIR PROTOCOLS

By D.W. Davies, D.L.A. Barber, W.L. Price, and  
C.M. Solomonides

Features extensive details on packet-switching—one of the most significant advances in communications-information processing. You'll also have material on all of the recent developments—such as those on security, which you must know in view of today's privacy legislation.

Other topics include: protocol structure and use... types of terminals and interfaces... advantages and disadvantages of various network structures... testing and evaluation... error reduction and network optimization... data flow and routing... congestion avoidance.

487 pp. (1979)

\$43.95

## MEGALINK™

1 Megabit/sec DMA transfer  
for up to 255 microcomputers  
on a 32,000 foot network

- Units for:
  - DEC Q bus\*
  - DEC Unibus\*
  - Intel Multibus†
- Integral 1 Megabit/sec FSK modem.
- Software drivers available.
- SDLC protocol implemented in hardware.
- Multidrop networks served by single coaxial cable.

Call Garry Stephens at Computrol, (203) 544-9371,  
or return card today for Megalink data.

My interest is: ☐ Q bus ☐ Unibus ☐ Multibus
